

Multimedia Final Reflection Paper

Name: _____

Date: _____ Per: _____

Points: _____ / 100

Objective: After completion of this assignment you will be able to summarize the larger theme of your final project, address technical difficulties and challenges encountered during the project, and address the adoption of new skills.

Instructions:

*Write in **one paragraph** an explanation of the larger theme that is supported by the video you are making and will finish for your Final Project. Explain the desired outcomes and how your project approximated your goals.*

*In a **second paragraph**, explain the technical difficulties you encountered and how they may be avoided. Explain both technical and personal solutions.*

*On a **third paragraph**, video summation paragraph, write about the challenges of learning how to produce digital video in an environment that is less than ideal. You will encounter this situation many times in the future in classrooms, companies, and your own offices. Write about your strategy for technical problem solving when new technology is being developed and you get caught in conflict.*

*On a final, **fourth paragraph** (take as many paragraphs as needed), describe different newly acquired skills gained in Multimedia 1 and Multimedia 2. Explain how these new skills may help you in the future. Possible examples may include working in groups, managing large projects, or learning on your own. (Must include much more information than "I learned how to work in groups.")*

Include references when appropriate.
